INITIAL VENDOR APPLICATION QUESTIONNAIRE (IVAQ)

<https://www1.apan-info.net/pasoc/SOCPACRequirements/tabid/7245/Default.aspx>

Headquarters Special Operations Command, Pacific (SOCPAC) is presented with numerous opportunities to explore and evaluate new and emerging systems and technologies. Generally, SOCPAC is only interested in technologies and capabilities that are fully, or near fully developed (TRL 8 or above). To assist decision makers determine the suitability of proposals for SOCPAC mission requirements, vendors and Government affiliated agencies interested in submitting a product or service for consideration are asked to provide the following:

1. One page executive summary information paper (sample template on website)
2. Standard quad-chart depicting cost/schedule/performance data (template on website)

As applicable, and to the fullest extent possible, please provide answers to the following questions within your executive summary and or quad chart:

- What is the name/title of this proposed program?
- What overall capability/technology does this proposal provide SOCPAC?
- Who are the primary users this capability/technology is geared toward?
- What are the specific tasks/processes the capability/technology is intended to enhance?
- What similar systems exist/are available? How is this product superior?
- Who is the program manager (please provide contact information)?
- Who is the lead engineer (please provide contact information)?
- What other organizations are using/requesting this capability/technology (please provide contact information)?
- Please provide any SOCPAC contacts you may have already established relationships with in connection with this proposal.
- How long has the system been a) in development or b) in use?
- What developmental/operational testing has been done to ensure the system works as advertised?
- What is the reliability of the system?
- What are the manning (military/contract) requirements for this system?
- What are the expected procurement and operational sustainment costs associated with this system? Please include detailed cost breakdown estimate by FY.
- What system support will be available for this program?
- Can the technology/output product from this program be shared with foreign partners?
- Is the technology/system interoperable with other systems in use at SOCPAC?
- What Technology Readiness Level (TRL) is this program ranked at?
- Will you prepare an ICP/CDD/CPD for this capability and provide it to the Program Manager?
- What do you need from SOCPAC (support, SMEs, etc.)?
- If this is a software system, do you have an Interim Authority to Operate (IATO)?
- Have you contacted any of SOCPAC's components (353 SOG; 1/1 SFG; NSWU-1) reference this proposal? If so, please provide POC and contact information.
- Do you have the ability to receive funds thru a MIPR (Military Interdepartmental Purchase Request)?
